Cruise Speed	25.5knots @ 2900rpm 35L/hr
Installed by	Seapower Australia Tom Lievense
Date Tested	23rd September 2011
Propeller Size	G4 Nickel Bronze Alloy

This beautifully crafted vessel, from West Australian aluminium experts Preston craft, is destined for the remote areas of Kununurra where reliability and cruising range are paramount. Fitted with the tried and tested Volvo Penta D6-330hp sterndrive package, both of these requirements are met. Initial sea trial gave a top speed of just under 34knots and comfortable cruising at 25knots and 35L/hr with even better fuel efficiency recorded at lower speed. Fitted with every option, including air conditioning, the new owner is sure to be the envy of the North West.
